***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

1. See applicant's remark filed 12/29/2008.
2. Claims **1, 6-14, 41 and 42** are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01, *In re Sneed*, 710 F.2d 1544, 1548, 218 USPQ 385 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims.
3. Specifically, claim 1 is directed to a computer-implemented decision support method for two or more pre-defined criteria (defined in spec [0003], [0018] pgpub html version) and two or more profiles, each criterion comprising two or more pre-defined and ordinally (defined in spec [0017]-[0018]) ranked categories, each profile comprising a set of two or more of the criteria each criterion in the set associated with one of the categories for that criterion, the method comprising: performing a comparative assessment of profiles, wherein the comparative assessment comprises an ordinal pairwise ranking of profile pairs (defined in spec [0075]-[0080] and Fig. 5), ordinal pairwise ranking of profile pairs comprising: generating undominated profile pairs (defined in spec [0080]), each undominated profile pair (defined in spec [0089] and Fig. 6) comprising two profiles wherein one profile has a higher ranked category on at least one criterion and a lower ranked category on at least one other criterion than the other profile; presenting the undominated profile pairs to a decision maker for ordinal pairwise ranking (defined in spec [0325]-[0326]); receiving from the decision maker an ordinal

pairwise ranking of the profiles (defined in spec [0327]-[0328]); and identifying profile pairs that are implicitly ordinally pairwise ranked as corollaries of ordinal pairwise rankings performed and excluding the profile pairs from subsequent presentation to the decision maker (defined in spec [0328]-[0329]); the decision support method further comprising: solving a system of equalities/inequalities that represents the ordinal pairwise rankings of profile pairs to obtain at least one output (defined in spec [0320]-[0334]), the at least one output including a point value for each category on each criterion, a ranking of all possible profiles, or a ranking of a subset of all possible profiles (defined in spec [0334]).

4. Claim 14 is likewise directed to a system of claim 1. It is allowable for the same reason.
5. Claim 42 is the same as claim 1 except the at least one output is point value, ranking of all possible profiles, and ranking of a subset. It is allowable for the same reason.
6. Claim 43 is likewise directed to a system of claim 42. It is allowable for the same reason.
7. A practical application for the invention is disclosed on [0017]: "It would also be desirable for this method to achieve accurate results while reducing the burden on decision makers of ranking pairs of alternatives by minimising the number of pairs they have to rank".

8. The Prior art NPL reference of Behnam Malakooti discloses ordinal ranking of multiple criteria. However, Malakooti fails to teach "undominated profile pairs" (aka unambiguous profile pair) as claimed.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
